

## **MEETING NOTICE**

The San Diego Chapter of the Society for Information Display  
**After-work Monthly Seminar Series**

*Non-Members are Welcome*

On  
Tuesday, February 17, 2004, 8:00 PM

**Jean-Pierre Guillou , Sony**  
Presents

### **"TV Technology Shoot-Out"**

at  
**Sony Technology Center**  
16530 Via Esprillo . Bldg.7  
Multipurpose Room  
San Diego, Ca. 92127

#### **Abstract:**

#### **TV Technology Shoot-Out**

Within the highly dynamic immediate future for the display industry there are still many technological challenges that must be overcome. I will discuss and demonstrate some of these technical challenges and introduce possible solutions that promise to be the hot topics of the coming years. We will have an open forum where we can discuss the strengths and weaknesses of these displays whilst looking at them side by side. Your opinion of the various importance of these limitations will be welcomed and then in the spirit of our times we will have a vote on the display that you would choose to take home with you!

#### **Bio**

Jean-Pierre Guillou is a Display Development Engineer at Sony's Technology Center in San Diego. His responsibilities there are to research new technologies with impact on Sony's Display Development and introduce solutions to specific challenges faced by

Sony's research groups. Before joining Sony Jean-Pierre completed a Masters in Experimental and Theoretical Physics at the University of Manchester in the United Kingdom. His research there was concerned with novel chiral nematic liquid crystal materials and their application in bistable reflective displays.

## **RSVP**

Starting at 6:30 P.M., Sony generously provides a complimentary buffet dinner. To provide Sony Food services with the expected attendance, please RSVP prior to February 10, 2004 to:
